This document contains a flow chart of progression in math for IB students and is valid for the 2015-16 and 2016-17 academic years. A student does not have to take all classes listed. The scholarship requires four progressive math credits, and students must at minimum complete Secondary Math 1, Secondary Math 2, Secondary Math 3 and one additional math credit. **Remember, a student's application is evaluated off of the courses completed, not the IB test that is taken.** The minimum math course sequence that includes an IB course is :

Contact the Regents' Scholarship office with any questions regarding IB Math and the scholarship requirements.

- IB Math SL (1 or 2) contains similar content to AP Calculus AB.
- IB Math HL 1 contains similar content to AP Calculus BC. There is little Stats in this course, therefore it could be followed by Stats.
- At Clearfield High School, IB Math HL 2 is similar in content to Statistics, thus a student would **NOT** be able to take AP Stats or CE Math 1040 and take IB Math HL 2, having both count towards the scholarship.
